EC 26-12

EUROPOWER batteries are made in AGM technology, constructed by plates, separators, safety valves and container. Since the electrolyte is held by a glass-mat separator and plates, batteries can use in any direction without leakage.

EC types batteries have been designed for **cycle use** (repeated cycles of discharging/charging). They sustain for **50 % cycles more** than EP types batteries.

Typical applications of EC types batteries:

- measuring instruments,
- mobile and portable light sources,
- wheelchairs,
- solar powered systems,
- motor scooters, mowing machines, toys, robots, etc...
