

SAFEasy™ TYPE 2 LIGHT CURTAINS

- **Integrated light curtains for BODY PROTECTION**
- **Versions with 2 / 3 / 4 beams**
- **Special slot for device setting**
- **35 x 40 mm compact profile**

SE2 SERIES

The **SAFEasy™** light curtains, according to the EN 61496-1 e IEC 61496-2 standards, are suitable for detecting the human body when approaching dangerous areas.

Models with different standard heights (500, 800, 900, 1200 mm), with 2, 3, 4 beams and operating distance reaching 50 m are available.

Specific dip-switches, that can be reached through a slot present on the front of the receiver protected by a lid and opened with a simple screwdriver, guarantee rapid and safe device setting.

The operator is thus able to configure, according to the specific needs, the manual or automatic reset, as well as the muting and partial muting functions.

The emitter-receiver units are optically synchronised and contain all the control circuits, inputs and outputs inside the housing. The **SAFEasy™** light curtains have also integrated the test function, running at the same speed of the response time, without stopping the machine's working cycle.

A wide range of industrial applications, requiring operator safety, can be solved by the **SAFEasy™** light curtains, thanks to the extremely compact dimensions (35x40 mm) and easy connection and installation.
